

PERKINS EXTENDED PROTECTION

Perkins® Platinum Protection

Extend your engine protection.

Extended protection is available beyond the standard warranty for eligible engines, covering parts and labour as defined by the programme and selected option.

1 Longer protection

Depending on the engine model, commissioning date and programme terms, selected options may extend protection for up to 10 years or 12,000 hours.

2 Parts and labour

Eligible repairs are covered within the limits of the selected option and the applicable programme terms.

3 Better cost control

Extended protection improves cost predictability by reducing exposure to unexpected repair bills during the coverage period.

4 Support from COMAPIRE

COMAPIRE checks engine eligibility and helps prepare the application in Morocco.

Check your engine's eligibility

To check eligibility, provide the serial number, commissioning date, operating hours and any available maintenance history.

The duration and scope of protection depend on the engine and selected option. All coverage remains subject to the official Perkins programme terms.
